The project aims to strengthen the oversight capacity of the Office of the Comptroller and Auditor General (OCAG) in relation to public revenues and expenditures. Through this initiative, improvements are expected in public financial management, transparency, and accountability and good governance.

The project consists of three main components designed to strengthen OCAG’s institutional capacity in conducting:

1. **Financial Audit** – supporting the institutionalization of financial audits of Budgetary Central Government (BCG) financial statements and Statutory Public Authorities (SPA), and promoting integration with Audit Management & Monitoring System 2.0 (AMMS 2.0);
2. **Performance Audit** – further strengthening the practice of performance auditing and its integration with AMMS 2.0;

3. **IT Audit** – supporting the development of an IT audit co-strategy and the conduct of IT audits, including model audits.

The implementation of this project is expected to further enhance OCAG's audit capacity and promote greater confidence in the proper use of public funds, thereby contributing positively to governance and strengthening Bangladesh's standing as a reliable partner in the international community.
